

Orchard Spacing

***** It is recommended that you double up on the amount of trees planted additional to come to the amount of trees listed above due to tree loss as one establishes the orchard*****

Figure 1 Pecan orchard design systems spacing diagram

Initial planting a minimum of 140 trees with 12.5 X 25 ft spacing for an ultra-density **non-irrigated** orchard setup.

Required spacing for mature orchard: A minimum of 70 trees with 25 ft X 25 ft spacing for a standard **non-irrigated** orchard setup

Initial planting a minimum of 55 trees with 20 ft X 40 ft spacing for ultra-density **irrigated-orchard**

Required spacing for mature orchard: A minimum of 27 trees with 40 ft X 40 ft spacing for an **irrigated - orchard**
